SAMPLE: a made-up business with made-up numbers. Not a real company.

Executive Summary

Harbor Oak Plumbing is a Greenville, SC business offering residential plumbing repairs and yearly maintenance plans. Its customers are homeowners within 20 miles. What sets it apart is same-day visits and flat prices.

The business is planned to open with $85,000 in starting money, made up of $25,000 from the owner and $60,000 from a loan. The money is set aside for a service van at $38,000, tools at $9,000, licences and deposits at $3,500, and $34,500 in working cash.

Harbor Oak Plumbing is projected to reach sales of $186,000 in year one, with a net profit of $10,063. The first month with a profit before tax is projected to be month 4. By year five, sales are projected to grow to $405,251, with a net profit of $128,872.

Dana Reyes, the owner, has a goal of adding a second truck in year three, which is not included in these projections.

The Company

Harbor Oak Plumbing is a residential plumbing business owned by Dana Reyes. It offers two things: plumbing repairs for homes and yearly maintenance plans. Its revenue is projected to come from two sources, service calls and maintenance plans.

The company operates in Greenville, SC, and is due to begin in January. At the start, the business is expected to open and make its start-up purchases in the same month: a service van, tools, and licences and deposits. A technician is projected to start in month 1, so the business begins with a paid employee in the field alongside the owner. Office help is planned to join in month 7.

Harbor Oak Plumbing is at the pre-opening stage. Its running costs are projected to include rent, insurance and van fuel. The business is projected to record its first month with a profit before tax in month 4, which is also when the owner is planned to begin taking regular pay from the business.

The company is set up as a small team with a clear focus: repairing home plumbing and keeping it in good order through yearly maintenance plans, serving customers in and around Greenville.

Starting Money and Its Use

Harbor Oak Plumbing is projected to open with $85,000 of starting money, drawn from two sources. The owner puts in $25,000, and a loan provides the remaining $60,000.

The loan is $60,000 at 9.5% over 84 months, paid at $981 a month.

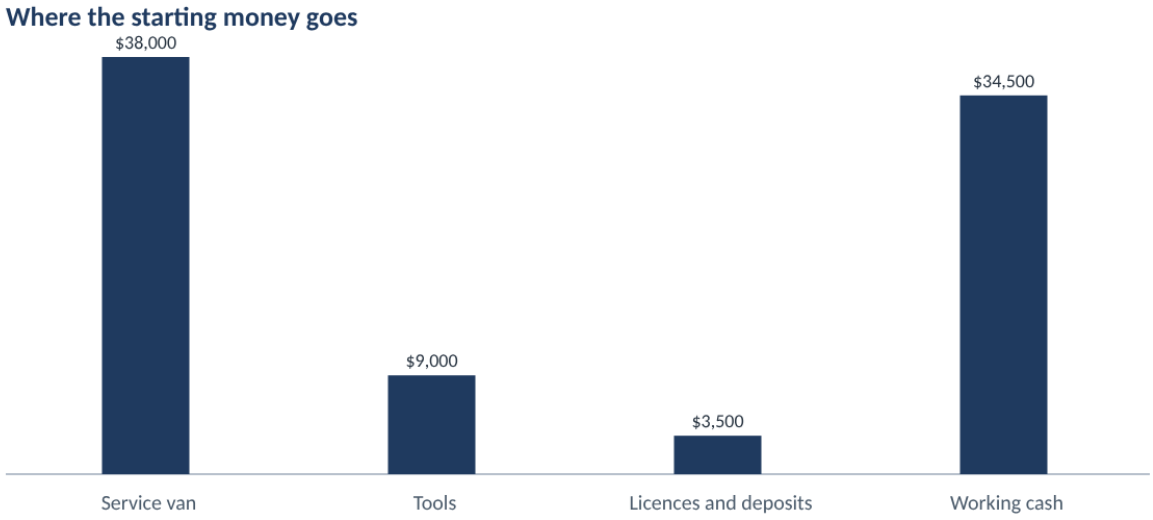

The starting money is used in four parts. The service van takes $38,000, tools take $9,000, and licences and deposits take $3,500. That leaves $34,500 as working cash for Harbor Oak Plumbing to run on once the business begins in January.

Where the starting money comes from

Source	Amount
Owner	$25,000
Loan	$60,000
Total	**$85,000**

Where the starting money goes

Item	Amount
Service van	$38,000
Tools	$9,000
Licences and deposits	$3,500
Working cash	$34,500
Total	**$85,000**

Products and Services

Harbor Oak Plumbing provides residential plumbing repairs and yearly maintenance plans. What sets the business apart is that it offers same-day visits and flat prices.

The business has two sources of revenue. The first is service calls, which cover the residential plumbing repairs that homeowners need. The second is maintenance plans, the yearly plans that give customers ongoing plumbing care. Together these two lines make up all of the sales that Harbor Oak Plumbing is projected to earn.

Harbor Oak Plumbing opens with a technician on staff from the first month, so that the business can offer its repair work and its maintenance plans from the day it begins trading. Office help is projected to join in month 7 as the volume of work grows.

Flat prices are central to how Harbor Oak Plumbing presents its services. A customer who needs a repair is offered a same-day visit rather than a wait, and the price is a flat one. The yearly maintenance plans

extend that offer to customers who prefer to have their plumbing looked after on a regular basis, rather than only when something goes wrong.

Harbor Oak Plumbing is projected to grow its sales from both service calls and maintenance plans over its first five years, with the combination of quick response and predictable pricing as the basis of its offer to homeowners.

Customers and Market

Harbor Oak Plumbing serves homeowners in and around Greenville, SC. Its customers are homeowners located within 20 miles of the business, and that radius defines the area the business is built to cover.

The business earns its revenue from two sources: service calls and maintenance plans. Both are aimed at the homeowners in that 20-mile area.

Harbor Oak Plumbing competes with two larger franchises and several one-truck operators. The franchises are the bigger names in the area, while the one-truck operators are small businesses of a similar kind to Harbor Oak Plumbing at its start. Harbor Oak Plumbing enters this market as a small, local business, opening with a technician from the first month and adding office help from month 7 as it grows.

The Industry and the Local Market

Harbor Oak Plumbing offers residential plumbing repairs and yearly maintenance plans in Greenville, South Carolina, and its customers are homeowners within 20 miles. The city of Greenville is the center of that service area. The U.S. Census Bureau's QuickFacts page estimated its population at 75,310 as of July 1, 2025 [1]. The same source recorded a population of 70,720 in the April 1, 2020 Census [2]. For the 2020-2024 period, the Census Bureau reported 35,482 households in the city [3].

The homes in the city are the setting for the work Harbor Oak Plumbing does. The Census Bureau reported an owner-occupied housing unit rate of 41.1% in Greenville city for the 2020-2024 period [4]. Median household income in the city was $71,472 (in 2024 dollars) for the same period, according to the Census Bureau [5]. These figures describe the city itself, while the business also serves homeowners in the surrounding area within 20 miles.

Harbor Oak Plumbing belongs to the plumbing trade. The U.S. Bureau of Labor Statistics, in its Occupational Outlook Handbook, reported that plumbers, pipefitters, and steamfitters held about 510,600 jobs in the United States in 2025 [6]. It gave the median annual wage for these workers as $63,800 in May 2025 [7]. The Bureau of Labor Statistics projects employment of plumbers, pipefitters, and steamfitters to grow 7 percent from 2025 to 2035 [8], which it expresses as an employment change of 34,500 jobs over that period [9].

Harbor Oak Plumbing is also one of the many small businesses in its state. The U.S. Small Business Administration's Office of Advocacy, in its 2025 Small Business Profile for South Carolina, reports 530,402 small businesses in the state, based on 2022 Census Bureau data [10].

Competitive Position

Harbor Oak Plumbing enters a market where the owner has named two kinds of competitors: two larger franchises and several one-truck operators. The business sets itself apart in two ways. It offers same-day visits, and it charges flat prices.

These two features shape how Harbor Oak Plumbing is set up. It starts with a technician from month 1 and adds office help from month 7. Its revenue comes from service calls and from maintenance plans, so the business is designed to earn from both one-off visits and ongoing arrangements.

The business is built to stay lean. Its start-up purchases are a service van, tools, and licences and deposits, and its running costs are rent, insurance and van fuel. Harbor Oak Plumbing is projected to reach its first profitable month in month 4.

Rather than competing on size, Harbor Oak Plumbing is positioned around speed and price clarity. Larger franchises and single-truck operators each serve the same customers in their own way, and Harbor Oak Plumbing aims to offer a distinct combination of same-day visits and flat prices.

Marketing and Sales

Harbor Oak Plumbing serves homeowners within 20 miles of its base. Customers are expected to find the business through two channels: its Google Business Profile and referral cards, which are left with every customer so that satisfied households can pass the name along to others.

What sets Harbor Oak Plumbing apart is how it sells. It offers same-day visits and flat prices, and these two points are central to how it presents itself to homeowners in its profile and on its referral cards. The business earns revenue from two sources: service calls and maintenance plans.

Sales are projected to start at $8,000 in month 1 and reach $23,000 in month 12, bringing Year 1 sales to $186,000. Harbor Oak Plumbing is projected to reach $292,602 in sales in Year 2 as its profile and referral cards bring in more homeowners. A technician is in place from month 1, and office help is projected to join in month 7 as the volume of work grows.

SAMPLE: a made-up business with made-up numbers. Not a real company.

Operations

Harbor Oak Plumbing operates in Greenville, SC, providing residential plumbing repairs and yearly maintenance plans. Its revenue comes from two sources: service calls and maintenance plans.

The business opens in month 1, when the start-up purchases are made: a service van at $38,000, tools at $9,000, and licences and deposits at $3,500. The remaining $34,500 of the $85,000 in starting money is held as working cash. Its running costs are rent, insurance and van fuel, projected at $2,500 a month, or $30,000 in year 1.

Harbor Oak Plumbing is staffed by a technician from month 1. Office help joins in month 7. Total payroll, including taxes and benefits, is projected at $73,248 in year 1 and $90,048 a year from year 2.

The business is projected to reach its first month with a profit before tax in month 4.

Management and Personnel

Harbor Oak Plumbing is owned and run by Dana Reyes, who has 12 years as a licensed plumber.

The business plans two paid roles. The Technician starts in month 1 and is budgeted at $50,400 in each of the five years. Office help starts in month 7 and is budgeted at $15,000 in Year 1 and $30,000 in each year from Year 2 through Year 5. Payroll taxes and benefits are projected at $7,848 in Year 1 and $9,648 in each year after that.

Total payroll for Harbor Oak Plumbing is projected to be $73,248 in Year 1 and $90,048 in each of Years 2 through 5.

Personnel plan

	Year 1	Year 2	Year 3	Year 4	Year 5
Technician	$50,400	$50,400	$50,400	$50,400	$50,400
Office help	$15,000	$30,000	$30,000	$30,000	$30,000
Payroll taxes and benefits	$7,848	$9,648	$9,648	$9,648	$9,648
Total payroll	**$73,248**	**$90,048**	**$90,048**	**$90,048**	**$90,048**

Goals and Milestones

Harbor Oak Plumbing is set to open in January, with the service van, tools, and licences and deposits purchased in the first month and a technician starting that same month. The business is projected to reach its first month with a profit before tax in month 4, and office help is planned to start in month 7.

The owner's stated goal is a second truck in year three, which is outside these projections because no cost or funding for it was supplied. By the end of year 3, Harbor Oak Plumbing is projected to have sales for the year of $325,842 and cash of $98,196, following sales of $186,000 in year 1 and $292,602 in year 2.

Harbor Oak Plumbing's plan sets the milestones in this order: opening and the first profitable month in year 1, and steady growth in sales through year 2. The second truck in year three remains a goal that is not included in these projections.

Milestones in the numbers

Month	Event
1	The business opens and the start-up purchases are made
1	Technician starts
4	The owner begins taking $3,000 a month
4	First month with a profit before tax
7	Office help starts
12	End of year 1: sales for the year $186,000, cash $23,609
24	End of year 2: sales for the year $292,602, cash $51,433
36	End of year 3: sales for the year $325,842, cash $98,196
48	End of year 4: sales for the year $363,201, cash $166,396
60	End of year 5: sales for the year $405,251, cash $258,898

Strengths, Weaknesses, Opportunities and Threats

Strengths: Harbor Oak Plumbing sets itself apart with same-day visits and flat prices. Dana brings 12 years as a licensed plumber to the business.

Weaknesses: Harbor Oak Plumbing is new, starting in January. It is projected to run at a loss in the first three months, with a loss of -$6,319 in month 1, and to reach its first month with a profit in month 4. It relies on two sources of revenue, service calls and maintenance plans. If sales came in 20% lower, Harbor Oak Plumbing is projected to finish year 1 with a net profit of -$14,022.

Opportunities: Harbor Oak Plumbing aims to add a second truck in year three, which is outside these projections. Sales are projected to reach $325,842 in that year, against $186,000 in year 1.

Threats: Harbor Oak Plumbing faces two larger franchises and several one-truck operators. A slow first winter is a risk, and the business sells maintenance plans to even out income.

SAMPLE: a made-up business with made-up numbers. Not a real company.

Risks and How They Are Managed

Harbor Oak Plumbing names two risks. The first is a slow first winter. To even out income through that period, the business sells maintenance plans, which are one of its two revenue sources alongside service calls. The plan shows the first year is projected to close with cash of $23,609, and the lowest point in the year is projected to come in month 9, at $21,166.

The second risk is competition. Harbor Oak Plumbing faces two larger franchises and several one-truck operators.

The plan also shows how sensitive the first year is to sales. If sales come in 10% lower, cash at the end of year one is projected to be $12,904. If sales come in 20% lower, cash at the end of year one is projected to be -$476, with the lowest cash of -$6,271 falling in month 24. Costs are left as planned in those cases.

Financial Plan

Harbor Oak Plumbing is projected to open with $85,000 in starting money. The owner is projected to put in $25,000 and a loan is projected to provide $60,000. The money is planned to go to the service van at $38,000, tools at $9,000, licences and deposits at $3,500, and working cash of $34,500.

Sales are projected at $186,000 in year one and $405,251 in year five. The business has two sources of revenue, service calls and maintenance plans. A technician is on the payroll from month 1, and office help starts in month 7.

Harbor Oak Plumbing is projected to show its first monthly profit in month 4, when profit before tax is projected at $220. The first three months are projected to show losses, the largest in month 1 at -$6,319. The owner begins taking $3,000 a month in month 4.

Cash at the end of each year is projected as follows: $23,609 at the end of year one, $51,433 at the end of year two, $98,196 at the end of year three, $166,396 at the end of year four, and $258,898 at the end of year five. Within year one, cash is projected to be lowest at $21,166 in month 9.

The loan is $60,000 at 9.5% over 84 months, paid at $981 a month. The loan balance is projected to be $53,661 at the end of year one and $21,358 at the end of year five.

Projected profit and loss

	Year 1	Year 2	Year 3	Year 4	Year 5
Sales	$186,000	$292,602	$325,842	$363,201	$405,251

11	$21,636	$5,945	$7,504	$2,500	$4,513	$23,569
12	$23,000	$6,300	$7,504	$2,500	$5,526	$23,609

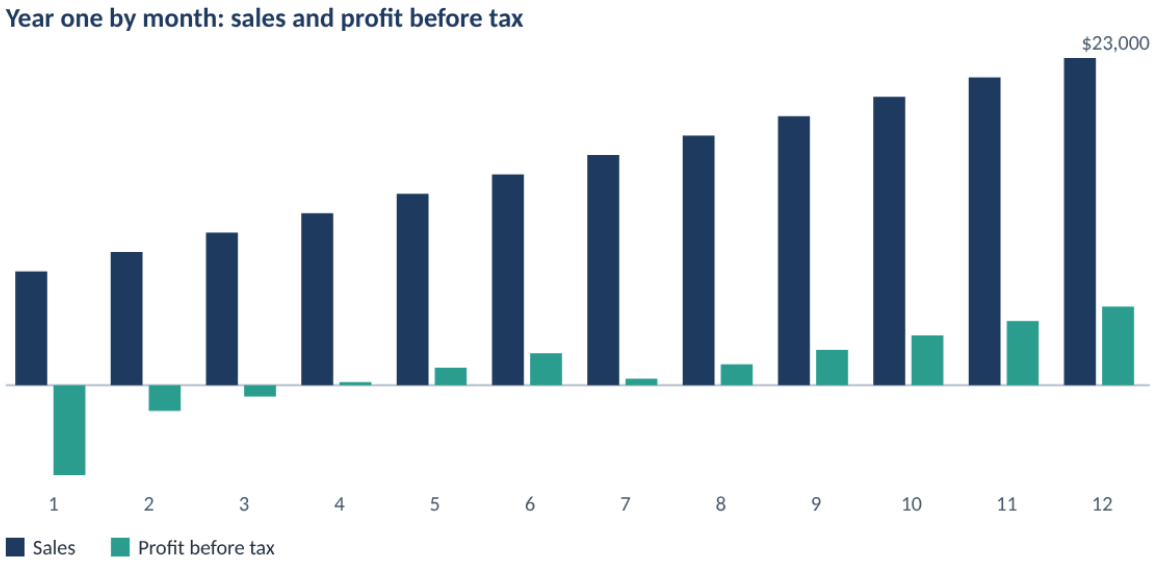

Income tax for the year is worked out once, at the end of month twelve, and is not shown in this table.

Sales and net profit by year

Cash at the end of each year

If Sales Differ From Plan

If sales come in below plan, Harbor Oak Plumbing is projected to see a different year one. With sales 20% lower, year one sales are $148,800, net profit is -$14,022, and the lowest cash balance is -$6,271, reached in month 24. With sales 10% lower, year one sales are $167,400, net profit is -$642, and the lowest cash balance is $11,722, reached in month 10.

If sales are 10% higher, year one sales are projected to be $204,600, net profit $20,633, and the lowest cash balance $28,783, reached in month 8. For comparison, the plan as written has year one sales of $186,000, net profit of $10,063, and a lowest cash balance of $21,166 in month 9. Each case raises or lowers every source of revenue by the same share, and costs are left as planned.

In year one, Harbor Oak Plumbing's gross margin is 71.9%. The sales needed to cover fixed costs are $163,428, which is 87.9% of projected sales.

If sales differ from plan

Case	Year 1 sales	Year 1 net profit	Lowest cash	In month	Cash, end of year 1	Cash, end of year 5
Sales 20% lower	$148,800	-$14,022	-$6,271	24	-$476	$74,672
Sales 10% lower	$167,400	-$642	$11,722	10	$12,904	$168,122
As planned	$186,000	$10,063	$21,166	9	$23,609	$258,898
Sales 10% higher	$204,600	$20,633	$28,783	8	$34,180	$349,538

Each case runs the same plan with every source of revenue raised or lowered by the same share. Costs are left as planned.

Key ratios

	Year 1	Year 2	Year 3	Year 4	Year 5
Gross margin	71.9%	72.7%	72.9%	73.2%	73.4%
Net profit as a share of sales	**5.4%**	**21.2%**	**25%**	**28.6%**	**31.8%**
Payroll as a share of sales	39.4%	30.8%	27.6%	24.8%	22.2%
Running costs as a share of sales	16.1%	10.5%	9.6%	8.8%	8.1%
Break-even sales as a share of projected sales	87.9%	63.2%	56.6%	50.6%	45.2%

Appendix A: The Figures This Plan Is Built On

Every projection in this plan is worked out from the figures below, which the owner supplied.

Sources of revenue

Source	Sales in month one	Sales a month by month twelve	Direct cost	Yearly growth after year one
Service calls	$8,000	$20,000	30%	10%
Maintenance plans	$0	$3,000	10%	20%

Paid roles

Role	Monthly cost	Starts in month
Technician	$4,200	1
Office help	$2,500	7

Payroll taxes and benefits are added at 12% of pay.

Running costs

Cost	Monthly amount	Starts in month	Yearly increase
Rent	$1,500	1	3%
Insurance	$400	1	0%
Van fuel	$600	1	2%

Start-up purchases

Item	Amount	Treated as	Years it lasts
Service van	$38,000	Equipment	5
Tools	$9,000	Equipment	7
Licences and deposits	$3,500	One-time expense	

Equipment and depreciation

Item	Cost	Years it lasts	Depreciation a year
Service van	$38,000	5	$7,600
Tools	$9,000	7	$1,286
Total	**$47,000**		**$8,886**

Other figures

Item	Figure
Cash from the owner	$25,000
Loan	$60,000 at 9.5% over 84 months
Income tax rate	21%
Owner’s monthly draw	$3,000 from month 4

Appendix B: Profit by Month, Years Two to Five

Year two

Month	Sales	Direct costs	Payroll	Running costs	Profit before tax	Cash at month end
13	$23,205	$6,352	$7,504	$2,557	$5,627	$26,421
14	$23,413	$6,405	$7,504	$2,557	$5,786	$29,387
15	$23,622	$6,459	$7,504	$2,557	$5,946	$32,508
16	$23,834	$6,512	$7,504	$2,557	$6,108	$35,788

Assumptions

- Sales and costs are counted when cash changes hands; no customer credit, supplier credit or stock is modelled.
- Sales rise in a straight line from month one to month twelve, then grow at the yearly rate given for each source.
- Equipment is written down evenly over the years it is expected to last.
- Income tax is worked out once a year on that year's profit; losses are not carried forward.
- The loan is repaid in equal monthly payments from month one.
- The owner's goal ("A second truck in year three") is not included in these projections. No cost, date or funding for it was supplied, so every table shows the business without it.

About These Projections

These projections were prepared from figures and assumptions supplied by the owner. They are estimates, not a promise of results. They have not been audited, reviewed or compiled by a certified public accountant, and no assurance is given on them. This document is a planning tool for the owner. It is not financial, tax or legal advice, and it is not an offer to arrange or obtain financing.
